

SpeedFit Curved Treadmill

SpeedFit is the latest innovation in self-powered, curved treadmill design and is quickly becoming the cardiovascular machine of choice for both gym-goers and owners. The patented curve design conforms better to your stride and encourages running on the balls of your feet, recruiting more muscles groups than the traditional heel strike method. This new style of running follows the same basic principle used in the training of sprinters.

Technical Specification

Cushion System	Advanced shock absorbing composite material
Controls	User generated speed control
Resistance System	None
Drive System	One way non-motorised drive system
Speed Range	0mph - no maximum speed
Incline Range	Fixed Incline
Belt Type	Roller belt system
Product Weight	130kg / 287lbs
Maximum User Weight	180kg 176lbs
Running Area	L 162 x W 43 cm L 64 x W 17 inches
Assembled Dimensions	L 162 x W 76 cm L 64 x W 30 inches

Key Features

Transport Wheels	●
Heart Rate Monitor	●
Effortless Running	●
Shock Absorbing Tread Material	●
Flywheel and Damper	●

Electrical Specifications

Power Requirements Self Powered

Motor None

Display Specification

Display Simple and intuitive console readouts

Display Features Calories, Heart Rate, Distance, Time, Speed

Connectivity Polar and ANT+ Heart Rate Connectivity
