

Pursuit 2.0 Bike

Gymgear's Pursuit Bike uses dual, enhanced poly groove belts with the self-tensioning system, the belt-driven bike provides a smooth and quiet cycling experience. The Pursuit Bike makes practical and effective use of a FreeWheel design to enhance your training, like a real road bike. When you stop pedalling, the flywheel continues to turn even though your feet have stopped. This forces the rider to use all of the muscles in their legs to move the flywheel. Gym Gear's Pursuit 'bike has a bright-lit colour coded LCD display. It is the only Air and Magnetic resistance machine that has the damper level and magnetic level displayed directly on the screen. The easy to read console is designed for simplicity and the ability to know your progress at all times.
